# About us

Since 1992 Ecoline has specialized in the design and construction of water treatment plants for food use in the private and public sectors.

Ecoline was among the first companies to operate in the sector tap water. Thanks to constant investments in research and innovation projects is able to offer technologically advanced products, characterized by high quality standards.

The positive results gathered in over twenty years of experience and the customer satisfaction has always been a source of pride and fixed point from which to start again for new challenges.

Ecoline has been able to grasp and anticipate the needs that are also emerged in other sectors, such as the public one administration. A path dedicated to quality also appreciated by entities, local health authorities and public companies who choose Ecoline to carry out projects aimed at promote energy savings and well-being.

# 02 Mission

Ecoline is an Italian company committed to bringing pure and healthy water to all those who believe that the best water is **KM ZERO.**

*For you and for our planet.*

### Quality

Ecoline s.r.l. offers facilities domestic professionals made in Italy, rigorously certified and guaranteed according to regulations CE and ISO 22000 for safety food.

### Professionalism

Our technicians have always worked for guarantee the assistance you have need, keeping efficient and secure your system.

### Sustainability

With an Ecoline system the saving always coincides with respect for nature. Help to reduce plastic consumption and keep the environment clean.

### Savings

You save and you earn!  
The cost of the treated water is significantly lower than that of bottled water.

**PURE  
WATER  
AT YOUR  
HOME**

# Plastic Free

With "plastic free" virtuous behaviors are kicked off that revolutionize our future way of life.

With ecoline you can avoid hundreds of thousands of abandoned bottles that increasingly end up in the sea.

We need a change in behaviour, which requires us not only to stop using plastic but, more generally, to put the environment at the center of every idea of development and growth.

This change is possible only if it starts from everyday life, from our everyday habits, from education to respect for the environment to be passed on to future generations.

#greenchallenge

**100  
THOUSAND**

About 100,000 marine mammals are killed each year by plastic and at least one million seabirds die annually due to ingested microplastics (Unesco data 2019).

**15%  
RECYCLING**

15% recycling Worldwide, only 15% of plastic waste is recycled. 25% is burned in waste-to-energy plants and 60% goes to landfills or is burned outdoors or dispersed into the environment.

**150  
MILLION**

To date, there are 150 million tons of plastic in the world's seas and, if this trend does not stop, by 2050 there will be more plastics than fish in the oceans (WWF 2020 data).

**HEALTH**

some studies report the presence of microplastics in tap and bottled water (WHO 2019 data).

# 04 Sectors

## Solutions for every need

HOUSEHOLD

HO.RE.CA.

SERVICES TO  
CORPORATE  
EMPLOYEES

WATER HOUSES

# Household

State-of-the-art plants in the production and purification of domestic drinking water.

Use of reverse osmosis technology with remineralization chamber, microfiltration and ultrafiltration.

Purification plants integrating a carbonation system and refrigeration to satisfy the needs of lovers cold sparkling water, just like at the bar.

Limescale removal systems.

# HO.RE.CA

Draft water systems for bars, restaurants, hotels and catering, designed to obtain chilled, still or sparkling water.

Connected directly to the water supply they guarantee in each instant and continuous dispensing of pure water, free from flavors and odours.

Personalization of bottles for catering activities.

# Services to corporate employees

Office columns for dispensing room temperature, cold (still or sparkling) and hot water.

Ecoline office water dispensers offer numerous advantages in terms of efficiency, convenience and savings, alleviating many of the problems associated with the management of drinking water in plastic gallons (refuelling, transport, storage, disposal of empty bottles).

## Vending

Dispensing systems that replace the classic plastic bottle dispensers, creating a new eco-sustainable vending concept for large companies, sports facilities, commercial malls, hotels and residences.

# Water house

The Water house is a “zero kilometer” service as the water supplied is supplied directly from the local water network. It is a complete project that gives communities the possibility to choose to save economic and environmental resources.

Among the advantages of this service: the reduction of costs disposal of plastic bottles, the reduction of waste accumulation in homes and the massive certified economic savings (about \$ 600.00 per year for an average family).

# Certifications

# 05

## ISO 22000

Ecoline offers highly professional systems, built in compliance with all EU and international regulations.

**ISO 22000 certification guarantees reliability of the Ecoline production chain in achieving of the specified objectives and in compliance with the requirements regulations and contracts established by law.**

Voluntary adherence to a certified management system wants to be a stimulus to continuous improvement performance in terms of food safety, as well to a further demonstration of reliability and seriousness of the company towards customers and end users.
